Madrid, December 18, 2017

To whom it may concern,

I am writing this letter to support the job application of César Castro Rozo.

I co-authored a paper with César: "The deflationary effect of oil prices in the euro area", published in Energy Economics (Q1 in 'Economics' according to JCR). Actually, we are working in a new research paper.

My experience working with César clearly demonstrates that he is a very good researcher. I will highlight his analytical capabilities as well as his excellent skills using statistical and scientific software (R, Latex, Gretl...). I would also emphasize that he has a very remarkable professional experience as a researcher in the Instituto Flores de Lemus (Carlos III University) where I first met him.

César is very hard-working, smart, rigorous and self-motivated researcher. In addition, I would highlight his personal skills. He is very friendly, shows the required capabilities to work in a team and is very easy going.

Therefore, I strongly recommend him for this job application.

If you have further queries, please do not hesitate to contact me.

Best regards

Andrés Barge Gil
